AVAILABLE IN 4 SIZES

Futura trailers are designed to transport wide and low race and classic cars without the hassle of using ramps or a tilting deck.

The trailers are very light and easily managed by one person.

BUILT TO LAST

Futura low loader trailers are light-weight and built to last - with a chassis made from structural-grade, anodized aluminum and cleverly hidden, solid aircraft rivets rather than welds.

This provides excellent corrosion resistance and prevents fatigue cracking.

ENGINEERED TO BE EFFORTLESS

The simple, elegant design is backed by clever engineering that allows you to raise and lower the trailer from the driver's seat in less than a minute. With plenty of door clearance for almost every make and model of car, you'll have no trouble getting in and out of your car.

LOADING YOUR CAR HAS NEVER BEEN EASIER

You can drive any make or model of car straight on and off Futura's low-loader trailers without the need for ramps or blocks.

The wide-deck and low approach angle make loading your car a breeze – Just grab the remote control and drive on, it's as quick and easy as opening your garage door.

"The Unser Motorsport Museum depends on Futura Trailers for easy and damage-free loading, unloading and transporting of our family's collection of iconic race cars"
